Summary

I am incredibly proud of the 24 years I spent as the founder and President of Spectrum Printing & Graphics, our incredible accomplishments we had as a team, and the amazing people I had the privilege of calling coworkers, vendors, and clients.

In 2021, when Ironmark approached us to join forces, I knew it was time for us to expand into all the new services they could offer our clients and for me to explore some new opportunities like fully indulging my addiction for sport touring motorcycle riding through the Appalachian Mountains!

Thanks to happenstance, I also took a Trip School course on becoming a tour guide and have not looked back since. I am now a passionate licensed DC area tour guide specializing in multi-day student and bike tours. I love welcoming my guests to DC for the first or fiftieth time and sharing with them some of the people, places, and events that have shaped both our country and my hometown.

Washington DC

My role as a guide in DC is to immerse students in the historical and political heart of the nation. As we walk the hallowed halls of museums and monuments, they gain a firsthand understanding of American history, government, and civic responsibility. Beyond textbooks, this experience fosters a deep appreciation for democracy, instills a sense of national pride, and sparks a passion for active civic engagement that hopefully will last a lifetime.
